

RM Frobisher

Archaeological Prospecting Equipment

The RM Pro Cart will fit into the boot of most cars. It has a packed size of 120cm by 60cm by 40cm. Including the 60cm diameter wheels.

RM Frobisher products are available to be purchased online from our website at www.rmrobisher.co.uk. We accept payment by debit or credit card online. We also accept cheques, BACS, CHAPS, SWIFT, and Faster Payments. Contact us for a quotation or *pro forma* invoice in UK pounds, Euros or your local currency.

RM Frobisher is a leading UK innovator of geophysical and remote sensing technologies for archaeological prospecting. Our specialist expertise and unrivalled experience are relied upon by users throughout the world to ensure the highest levels of performance.

RM Pro Unit

- Clear eight line graphic display
- Visible in direct sunlight
- Four sensor inputs
- RS232 GNSS data port
- Long battery life
- Waterproof (IP65)
- Supplied with fittings and cables

RM Pro Control and Logging Unit

- Fast zero - under 60 seconds!
- No need to align the sensors
- 0.015 Nano Tesla resolution (20 bit ADC)
- Compact 650mm sensor separation
- Up to 100m by 100m grids
- 4 readings per metre (Grid Mode)
- 10 reading per second (GNSS or Time Base Mode)
- Results saved on SD memory cards
- Water and dust proof to IP65
- Lightweight control unit (600g)
- Fast charging long life Lithium batteries
- Over eight hours battery life (four sensors in Grid Mode)
- Charge using any USB2 socket
- Four wire Kelvin connection for high accuracy measurements, signal to noise ratio improved by $\sqrt{2}$
- Advanced Digital Signal Processing (DSP) for 50/60Hz filtering

RM Pro Cart

- Totally non-magnetic - contains no metal parts
- Four sensor mountings
- Fast sensor attachment
- Lightweight
- Rugged and robust construction
- Supplied with non-magnetic assembly tools
- Compact packed size
- Easy to assemble
- Low maintenance
